

Best Manufacturer & Supplier of **PLASTIC PALLETS** in India

Awarded By - Worldwide Achievers

U n i q u e S o l u t i o n s F o r e v e r

SWIFT Group is a unique thinking and technologically advanced industrial plastic products manufacturer in India and recognized as a leading supplier in industrial plastic products. We offer expertise in plastic molding through our core strength of ability to innovate, design and manufacture wide range of products which is suitable for all kind of industrial segments. We create value for our clients and partners in business. At the same time, our measures ensure we fulfill the diverse needs of customers. We view this as long term of competitive advantage by providing superior products for wider applications from both quality & economic viewpoints. We are committed towards supply good quality products, excelling laid down standards to delight our customers by continually upgrading our skill by maintaining a speedy and flexible approach we have been able to provide a stable and reliable supply base for our customer.

CORE VALUES

▪ **Customer Centric**

We believe that customer is center of our business universe, they actually drives company success and helps in overall development of organization. Hence we will strive to do what is in the best interest of our customer.

▪ **Respect and Care**

We value difference in everyone, hence we respect and treat every human with dignity, courtesy and care.

▪ **Learning**

We believe constant learning is most important aspect to achieve success, excellence and future alignment of the personal & organization growth.

▪ **Adaptability**

In Today dynamic and fast paced global economy we always focus on envisioning future of our organization by anticipating demands so that we can consciously navigate our company for next generation.

▪ **Dedication**

We believe that dedication, commitment, perseverance with integrity & honesty are the key factors to achieve desired objective from any work we do.

R & D - KNOW HOW FOR YOUR ADVANTAGE

Our research and development team work continuously to improve our products. We always try to manufacture products from new advanced raw materials, utilizing the most modern technologies and has a customer centric approach in order to provide for almost every need of customers. Our Modern technology has been mutual benefit for our customer as well as for us. This has also guaranteed high quality performance products for customer specified solutions

We follow a high quality standards of technical excellence scaling new heights in its determination to deliver the best.

SUPERIOR QUALITY STANDARD

Quality is our hallmark, our range of products are in compliance to international quality standards. We always ensure in providing paramount quality products to our esteemed clients. To ensure cost-efficiency & perfect designing, we follow internationally accepted quality parameters. We are committed to supply good quality products, excelling laid down standards to delight our customers.

INNOVATIVE DESIGN & IDEAS

SWIFT works closely with its customers to identify their needs. An effective material handling pallet program begins with a careful analysis of the application. Our team experts provide continuous support to incorporate innovation and cost effective solution.

FLEXIBILITY OF CUSTOMIZATION

SWIFT has the capability to custom design products to meet your specific plastic product's needs. Our ranges of plastic pallets are well suited for all industries. We can design a custom application or provide a proven product that helps to get your material moving in the right direction.

WIDE RANGE OF PRODUCTS

SWIFT is having a 125+ unique variants of pallets which designed as per upfront needs of industries as every company requirement is different by their products, packing or even culture of handling. Apart from that , range of products includes Material handling Equipment, Road Safety Products, Nirmalya Kumbh kalash, Drum Spill Pallets, Custom Design Products and many other plastic products.

AVAILABILITY

We stock plastic pallets for immediate delivery throughout the India, although we can supply a wide range of plastic pallets and as per customer needs.

BENEFITS OF PLASTIC PALLETS

■ Safe for Handling

It is known that faulty wooden pallets are dangerous for the operation. Our pallets will ensure the safety of its usage for a long time and will increase safe material handling on shop floor hence no injuries or material damages.

■ Strong & Durable

One Piece Molding structure of plastic pallets, ensure the safety of its usage for a long time, Even after a few years of usage, our pallets will retain its original condition in terms of size, rigidity and shock absorbency.

Greater automation requires repeatability and reliability, and plastics' tailored designs and consistent dimensions and weights offer a distinct advantage over wood pallets, which are vulnerable to splintering off shards and pulling apart as nails loosen.

■ Clean & Sanitary

Swift pallets are weather proof, termite proof & Fungus resistant, & can be easily cleaned by water or air.

■ Resistant to Chemicals

Swift plastic pallets are resistant to most chemical hence does not rot, decay, decompose or react with stored material, it will protect your material at their best condition.

■ No Maintenance Cost

One Piece Molded Swift Plastic pallets doesn't require any kind of maintenance No joints, No screw, nails hence No maintenance required like wooden pallet.

■ Standard Design & Specification

Design and specifications of pallet are as per international quality standards; hence swift pallets are suitable for all kind of industries and can be handled by any standard handling equipment.

■ Natural Resources Savings/ Recyclable

Plastic pallets are made from recyclable Polyethylene material. This preserves natural resources, while reducing waste. Wooden pallets consume precious natural resources; up to 10 million trees are cut every year to produce the same.

■ Color choice to customer

We can manufacture pallets as per customer's color choice and it can be color coordinated to identify goods in a warehouse.

Cost effective

The initial cost of plastic pallets is a great deal more than wooden pallets, but Life span of plastic pallets is several times longer than that of the wooden pallets. Due to its durability and benefits, users can realize the cost savings in using plastic pallet within 3 years

MOLDED PLASTIC PALLETS

Swift Rotomolded plastic pallets are innovative and perfect solution for all kind of industries, specifically these pallets have great benefits for food and pharmaceutical Industries. These are in compliance with GMP/ HACCP/FDA norms of cleanliness and withstand temperatures to -40°C to, 60°C. One Piece molding structure with reinforcement ensures very long life of pallets with many great benefits. Swift pallets are available in many different models, shape, size and colors. A range of Plastic Pallets provides greater choice to our customers & meet their requirements of every storage & material handling application. Swift rotomolded pallets are segregated in different series, which will help our customer to choose their best suit immediately.

- **One Piece Molding**
Rotomolded pallets are molded in one piece body structure with steel reinforcement. No joints, nails hence increase safety on the shop floor, very long life and retain its original shape even after years of usage
- **Smooth Fork Entry**
Swift pallets are designed ergonomically for easy and safe handling. Smooth round leg designs of pallets helps fork to enter in proper way without damaging pallets while handling.
- **Flat Antiskid Top /Flat Plain Top**
Swift plastic Pallets are available with options of Plain top and Antiskid top, Grooved Top, or Custom Shaped Top.
- **High load bearing capacity**
Pallets are made up from best quality polyethylene material with steel reinforcement technology, swift pallets can be supplied for extra heavy application as per customer's needs.
- **TOP Safety Edge**
Plain Top pallets are available with options of top Side Edge, for additional safety while material handling. This feature can be useful for heighten rack storage of light weight products.
- **Rack Guide**
Pallets are available with additional safety features with rack guide, for critical racking application these feature is useful for heighted rack storage of very light weight products.
- **Antistatic Pallets**
An antistatic plastic pallet is reducing static electricity charges on equipment, either to prevent fires and explosions when working with flammable liquids and gases, or to prevent damage to static-sensitive objects such as electronic components or devices.

RANGE OF PLASTIC PALLETS

We are having range of models shapes and size of plastic pallets for every application, every load, it provides greater choice to our customers & meets their requirements of every storage & material handling application. For Heavy, Medium and light weight application.

PALLET CONTAINER

Model No.	: SIP-H2-1208350PC
Product Size (mm)	: L1200 x W800 H350 mm

Model No.	: SIP-H2-1208550PC
Product Size (mm)	: L1200 x W800 H550 mm

PALLET CONTAINER BOX BIN

OTHER PALLETS

2 WAY ENTRY RACKABLE PLASTIC PALLET with STRAPPING BELT

Model No.	: SIP-R2-1212GS-SO
Product Size (mm)	: L1200 x W1200 H160 mm

OTHER PALLETS

Stretchable rubber strap helps to hold the material with extra stability

Metal clamp increase the life of strapping

Provision for adjustment of strap

Safety edge to avoid slipping of material from pallet

PRECISION ITEM STORAGE TRAY

Model No.	: SIP-BTS-1265
Product Size (mm)	: L1270 x W650 H250 mm

Features:

- Manufactured from high Quality UV Food Grade polyethylene Material.
- Resistant to most of chemicals.
- Comply with GMP / HACCP / FDA / ISPM 15 Norms.
- Compatible with all standard handling equipment's.

DRUM SPILL PLASTIC PRODUCTS

DRUM PALLETS

DRUM SPILL CONTAINMENT PALLET:

Drum spill containment pallets are specially designed for the safe storage of oils, chemicals, catching the any leaks, drips, spills. These pallets are made up from high quality polyethylene materials and reliable construction, ergonomics and safety on the shop floor. Our drum spill containment will change your working environment. Our drum spill pallets are having reliable chemical compatibility and resistance - preventing corrosion and deterioration, assuring a long lifetime of service.

FEW TERMS RELATED TO PLASTIC PALLETS

- **OneWay Cargo Export Pallets**

These type of plastic pallets are designed economically for one-way shipments or general light warehouse and storage use. They vary in design and weight.

- **Regular Application Pallets**

These types of pallets are used for storage and handling of goods internally in the industries, these pallets are made for repeated use application though they are strong and long life.

- **Stacking of Pallets**

These pallets are designed with a bottom deck that allows you to stack pallets on top of other loaded pallets without damaging the bottom pallet material it is traditional system of material storage in industries.

- **Nestable Pallets**

Swift offering nest able Plastic pallets reducing costs by saving warehouse and shipping space. Nestability allows for more pallets per truck and limits storage space needed in warehouse.

- **Static Load**

Total material weight kept on the pallet when it is in static position on ground.

- **Dynamic Load**

Total material Weight kept on the pallet when it is in lifting position at the time of movement of material from one place to another place.

- **Rack Load**

Total material Weight kept on the pallet when it is kept in the rack.

- **Pallet Dimensioning**

Dimension along with Fork length is considered as Length of pallet and Dimension perpendicular to fork is considered as Width (Fork Entry) of Pallets.
